

**Bulloo  
Shire**

**TENDER No. 2025-2026-208**

**Turkey Nest Dam Construction**

**ADDENDUM No. 1**

**Issued 20 February 2026**

Tenderers are advised of the following additional documents provided to Tenderers, change(s) to the advertised tender documents, agreed answers to questions asked by prospective tenderers and/or additional information provided about the tendered works.

## Additional Documents

The following additional documents have been provided for inclusion as part of the Tender Submission Documents and/or information to assist Tenderers prepare their tender submissions.

Nil

## Tender Document Amendments

The following amendments have been made to the advertised tender documents. When submitting a tender, Tenderers must ensure that the correct, most recent version of the advertised documentation is used.

### Schedule K1 Contract Pricing Schedule

Revision 2 of Volume 3 Scope and Specification is issued with this addendum and contains:

- A new Clause 6.2 Measurement and Payment relating specifically to the manner in which the Principal will pay the Contractor for the supply and installation of hydraulic appurtenances materials and equipment via the Provisional Sum allowance.
- The remaining clauses in Section 6 Hydraulic Appurtenances have been renumbered to account for the addition of the new Clause 6.2

### Schedule K1 Contract Pricing Schedule

Revision 2 of Schedule K1 Contract Pricing Schedule is issued with this addendum and contains:

- Amended details for schedule Items 2.5 and 3.5 which have been converted to Provisional Sum Items with an allowance of \$40,000.00 to allow Tenderers to submit pricing on a consistent basis.

## Questions and Answers

Questions with agreed answers which have been submitted by prospective Tenderers. Please note that some questions may be edited for accuracy and clarity, or to remove identifying information about the questioner.

### Question

Is the tender for a design and construct contract?

### Answer

Yes. A reference design has been provided in Volume 3 Appendix B Concept Design. The design is required to ensure that a safe water retaining structure is constructed which meets the requirements of its intended need – holding, and supplying water for road construction and maintenance.

No geotechnical information or other site specific details such as a feature survey, have been provided with the Tender documentation.

**Question**

Does the design for the dam need to be approved by a REPQ Engineer?

**Answer**

Yes.

**Question**

Can you please provide details relating to the location and how the two dams will be supplied with water?

**Answer**

The location details have been provided in Volume 3 Appendix A Site Location Maps. Both sites are located on Warri Gate Road in the south-western region of Bulloo Shire. One of the sites is located at the intersection of Warri Gate Road and Orientos Road.

The dams will be supplied with water in the following manner:

North Dam – Will receive water from the Andromeda oil extraction operations. Water will be piped from their operations site approximately five kilometres to the north of the dam site. The transfer pipeline will be laid at surface level and pumped from the Andromeda site to the dam.

South Dam – Will receive water from an artesian bore which is due to be installed via a separate contract. The bore will be co-located with the dam. The bore is expected to operate under its own artesian pressure and not require pump equipment to operate.

**Question**

Can additional details be provided regarding the pipe connections and equipment that will be required on the inlet and outlet sides of the dam?

**Answer**

No. At this time the details of the connections required and pipe diameters are not known. With this addendum a revised pricing schedule has been released which provides for a Provisional Sum item for each dam for the supply of pipe and connection infrastructure which enables all Tenderers to submit pricing on a consistent basis.

**Additional Information**

Tenders shall note the following information and details relating to the Tender and submission process which is provided for information and notification purposes.

Nil

**Tender Documents**

The current revision number of the advertised tender documents is as follows:

<b>DOCUMENT</b>	<b>REVISION No</b>	<b>FORMAT</b>
